

DIRECTOR, MATERIAL AND SUPPLIER BASE

Role Description: Build wider capability within the Future Submarine Program Office to manage the material and supplier base for the Future Submarine in collaboration with the platform designer, DCNS, and combat system designer, Lockheed Martin Australia (LMA). This will involve:

- > Leading the Commonwealth's role in the selection of equipment suppliers proposed by DCNS and LMA.
- > Deepening the Commonwealth's understanding of the capabilities and capacity of suppliers.
- > Ensuring quality control requirements for the Future Submarine are detailed for each stage of the Program.
- > Establishing the system and organisation to meet quality control requirements for the Future Submarine Program.
- > Supporting establishment of the Integrated Product Development and Support Environment (IPDSE) for technical data management as the Future Submarine design is developed with respect to supplier furnished data.
- > Working with all Future Submarine Program Directors to support the coordination of the key program functions across design, construction, material and supplier base management, preparation for sustainment, test and evaluation, commercial, and program controls.
- > Mentoring members of the Future Submarine Technical Office and the Submarine Group combat system division to further develop capacity to manage the material and supplier base.

Position Location: Adelaide, Australia

Reporting to: Head Future Submarine Program
